

BRING
IN YOUR
EMPTY CHEMICAL
DRUMS AND MAKE
ME HAPPY

What's happening?

Chemical container recycling program **drumMUSTER** is calling on all local farmers and chemical users to bring in their clean, eligible agvet chemical containers to help out schools and community groups across the country.

drumMUSTER has teamed up with over 100 different community groups and schools across Australia to raise funds for their local initiatives.

What you can do to help

For every drum collected by the local community group money will be donated to that cause.

drumMUSTER is calling on parents, friends, family and neighbours who use agvet chemicals to return their drums to their local **drumMUSTER** site and make a difference to the local community and protect the environment at the same time. You can find your local site by visiting our website or calling us on the number below.

Remember to rinse all drums. Pierce metal drums to allow for better air-flow after rinsing. Plastic drums also need to have their lids removed before delivering.
